

Geraldy-Quality for the welfare of your pigeons

Optimal water-supply – hygienic, no dust, no droppings

Middle corridor with non slip checker plate, skylights, patented revolving drinking system, water supply and air ventilation for every single crate

gill-plates for the optimal exchange of air

The optimal supply on the road...

Middle corridor

The generous constructed middle corridor with electric lighting and skylights combined with temperature reducing insulated ceiling and a hygienic walkway made of aluminium non slip checker plate is the most modern system worldwide.

Revolving Drinking system

These drinkers reduce the danger of infection during transportation to a minimum. Only the pigeons of one crate drink out of one drinking canal. The easy handling of this system is brilliant. As near to perfection as you can get.

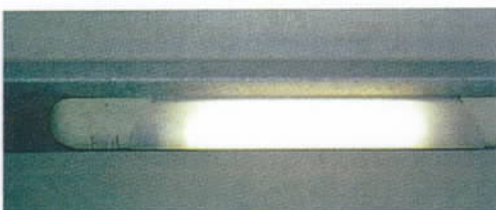

air-catcher for the supply with fresh air during transportation

Supply of fresh air

Through our air ventilation system every single crate is provided with fresh air. In addition there are ventilators for extreme hot weather. Fresh air for every pigeon is guaranteed.

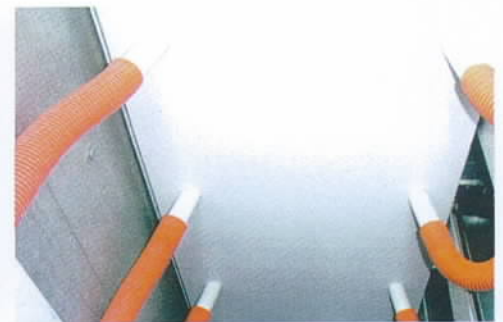

...the optimal condition at the start.

Lights to lighten up the middle corridor during darkness. Makes it easier for the pigeons to drink water. Lights to lighten up the middle corridor during darkness. Makes it easier for the pigeons to drink water

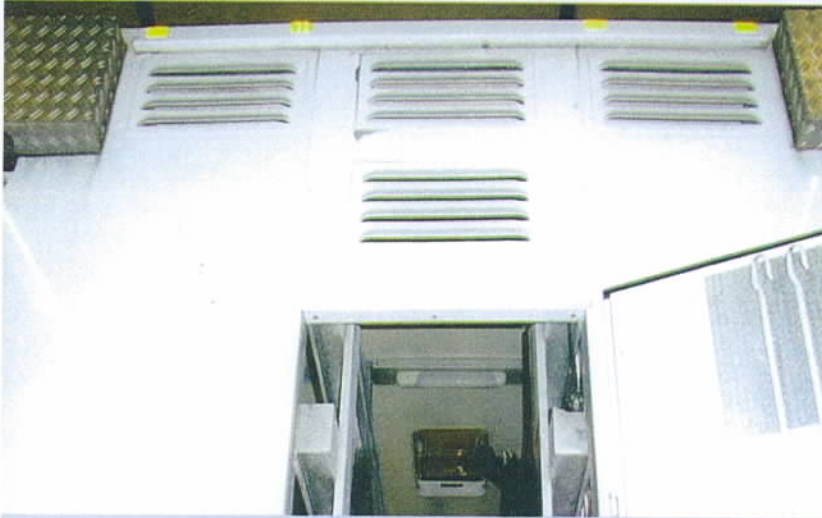

Skylights to lighten up the middle corridor and supply with fresh air

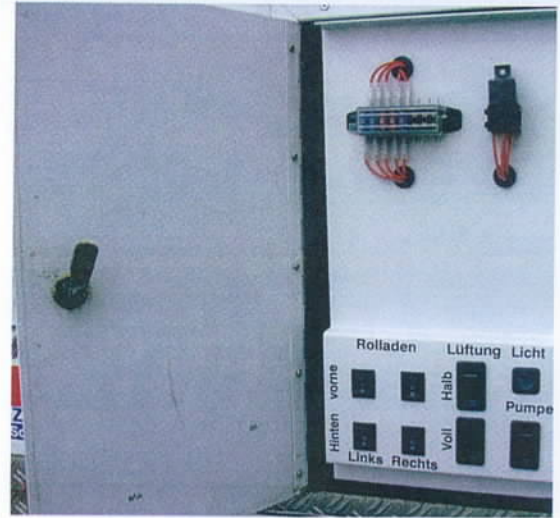

air for every single crate with a special air-ventilation-system

Most modern technology

Grill-plates for the outgoing air at the backside

Electr. Control of the shutters, waterpump, air-ventilation-system and the lights

Designed for your individual needs

No matter whether it is an articulated trailer or a training-trailer – the comfort for the pigeon is the same.

Our special way to build a transporter leaves every room for your individual requirements. Our team with specialists helps you to find the ideal solution.

Ventilators suited to the no. of pigeons

Handwinder for the case of a power failure

Patented crate with drinkers on 3 sides

Plastic-doors for a lightened environment for the better ventilation of the pigeons

Insulated aluminium-Shutter with ventilation slits.

Smaller Transporters in different sizes and designs

Combination for app. 2.800 pigeons – also different truck and trailer combinations are possible!

Transporter for app. 1.600 pigeons

Combination for app. 2.400 pigeons

Liberation with handwinder

Bodies built on small transporters are the cost effective alternative to the big transporters. More flexibility and an optimal supply of the pigeons is guaranteed.

Transporter for app 1.300 pigeons

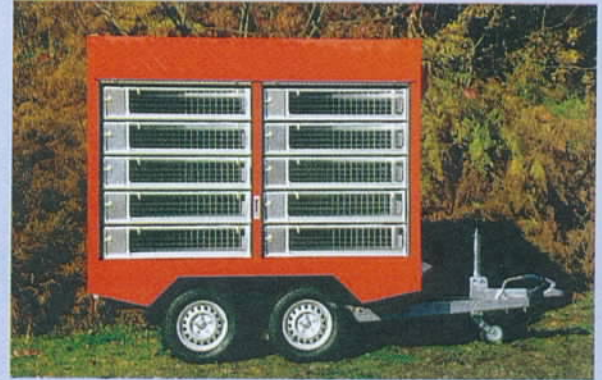

Middle corridor for an optimal supply of the pigeons

Trailers in different sizes and designs

Trailer for app. 1.250 pigeons, with middle corridor

Trailer for app. 500 pigeons, Twin axle

Trailer for app. 1.000 pigeons

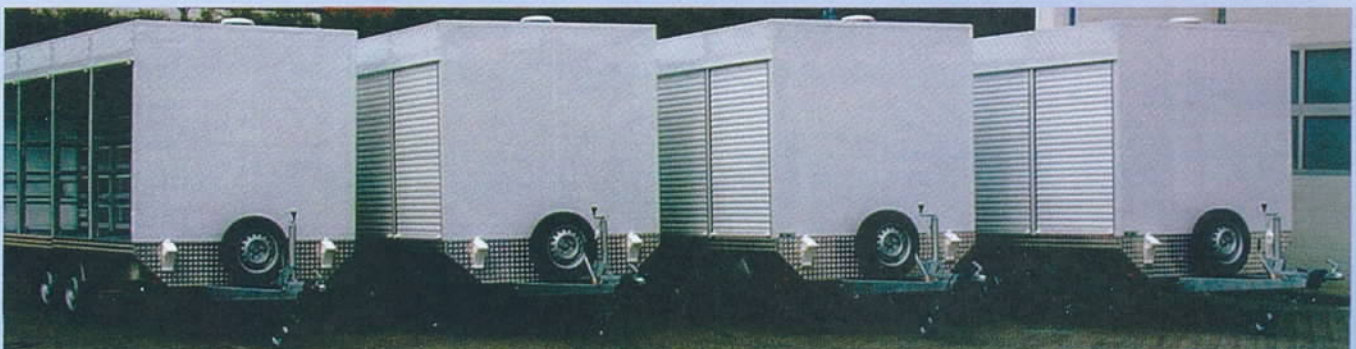

Special trailer for app. 1.050 pigeons

Trailer for app. 500 pigeons, Single axle

Our trailer are also available in every size and design

Training trailer in different sizes and designs

The training trailer with the chassis which is especially developed for the transport of animals, with independent suspension, can be used for different purposes. The trailer makes a stressless transport of the pigeons to the place of liberation or basketting possible

Training trailer with 8 crates for app. 160 pigeons

Delivery worldwide possible

Our trailers are equipped with drinkers and have 3 standard sizes:

- 1) 8 aluminium-crates for app. 160 pigeons
- 2) 12 aluminium-crates for app. 240 pigeons
- 3) 16 aluminium-crates for app. 320 pigeons

The trailer is available in different colours and it is possible to order it with the dripping-drinking-system. Special solutions to meet the needs of our customers are possible!

Training trailer with 12 crates for app. 240 pigeons

Training trailer with 16 crates for app. 320 pigeons

Special Solutions - no problem!
