

P Jacobs Winner Lyndhurst Y.B.C.

P Jacobs Winner Lyndhurst Y.B.C.

P Jacobs with SA04 06023 BCPH

Mike...What is the breeding of the bird that won the Lyndhurst open?

Phil...Mostly Janssen of Ponderosa pair # 13

Mike...How many races did your bird have leading up to its win?

Phil...It had 2 races leading up to the Derby, a Stirling North and a Parachilna.

Mike... Did you race the bird again after it won?

Phil...No I stopped it after it won, it was my second Association Win and I did not want to chance losing it.

Mike...How much loft flying do your birds do each day?

Phil...I like to see them do at least an hour or more each afternoon, as I work in the early mornings, afternoon training is all I can do.

Mike...How much tossing do you give your birds?

Phil... I mainly toss on the Association Transporter on the weekends.

Mike...Do you follow any particular feeding pattern?

Phil...No, I just look at what the weather is, and if it is going to be a hard race, I increase the Maize and Peas, and if it is going to be a quick race, I decrease them.

Phil Jacob's Racing Loft

Mike...Do you medicate often?

Phil...I use Turbosole in the water on a Monday after they have been away in the Race Unit, to control wet canker.

Mike...How many birds do you generally start the season with?

Phil...Usually I start with about 220 birds, mostly young birds, as I feel that old birds are only good for the first few races, then after that, the young birds usually dominate.

Mike...What changes would you like to see in the sport?

Phil...I would like to see a bit more harmony in the sport, also I would like to see more prize money in some sort of way, and to get younger flyers interested in the sport.
