Ideas on our sport: With the decline of flyer numbers in our sport Bill feels we should look at flying one line over a three year period, and keep to a fifteen week season. Starting at the beginning of June we would be finished by mid-September before it gets too warm. The one line racing would keep everyone on the same page, and we could start the first year on the North to North West line, then the second year move to the North East line, and then in the third year move to the South East line.

Congratulations Bill, you have set the standards high for the rest of the West Torrens members.
